

Smile Shapers Present

Advanced Approach to Clinical Aligner Success

2 FREE CEU

Course Date: November 12, 2025
7:00 pm Eastern Time

This course explores the evolution of clear aligner therapy through advanced plastics and precision manufacturing, empowering clinicians to achieve predictable tooth movement without reliance on attachments or interproximal reduction (IPR).

Upon completion of this course, participants will be able to:

- ✓ Describe how precision aligner manufacturing enables predictable movement without attachments or IPR.
- ✓ Differentiate between vertical and horizontal occlusal forces and their impact on abfractions and tooth wear.
- ✓ Evaluate how improved tooth position contributes to gingival health and periodontal stability.
- ✓ Assess the relationship between maxillary arch development, sinus capacity, and airway function.
- ✓ Apply airway-neutral to airway-positive orthodontic strategies using clear aligners.

Dr Kevin Goles

Dr. Kevin Goles has been immersed in dental sleep medicine since the beginning of his career and is recognized as an expert in the field. He focused his research during his dental residency on Obstructive Sleep Apnea and the substantial negative effects it can have on one's health and quality of life.
